I (M.v.W.) have nothing to declare

This is Constantin

He keeps saying:
«You cannot climb the
ladder of success (or a
mountain) with your
hands in your
pockets»
and
«No pain no gain»

Agenda

- **What kind of oncofertility networks do already exist?**
- **Why creating a network?**
- ***FertiPROTEK* experiences**
- **Conclusion**

Different kind of networks

Local networks

National networks

International networks

Different kinds of existing networks

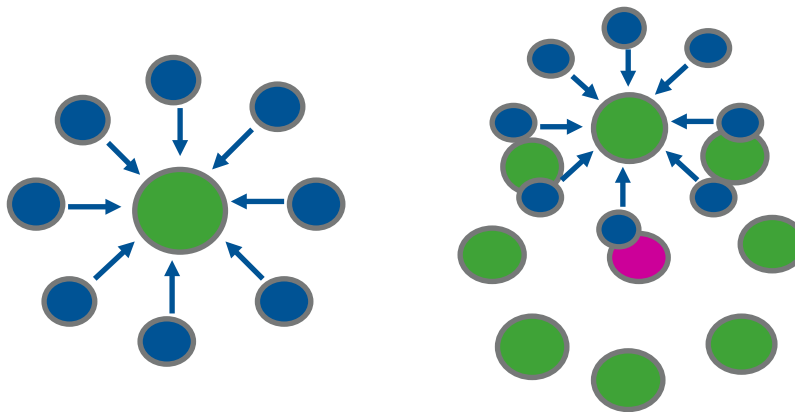

The screenshot shows the homepage of FertiPROTEKT, a network for fertility-protective measures. It features a navigation bar with 'CONTACT', 'ABOUT', 'FOR NEW PATIENTS', 'ABOUT US', and 'SEARCH'. The main heading is 'HERZLICH WILLKOMMEN AUF DER HOMEPAGE DES FERTIPROTEKT-NETZWERK E.V.'. Below this, there are three distinct network visualizations: a world map labeled '«Global»? network', a detailed map of Germany with numerous red dots representing medical centers, labeled 'Large national network', and a map of Denmark with a few red dots, labeled 'Small national network'.

«Global»? network

Large national network

Small national network

National networks

Small networks: centralized
Few specialised national medical centers: Denmark

Large networks: decentralized
Many specialised medical centers with a central coordinating body: Germany

Agenda

- What kind of oncofertility networks do already exist?
- **Why creating a network?**
- **FertiPROTEKT** experiences
- **Conclusion**

A large country can produce large scaled studies for scientific or national purposes.....

Large scales studies prepared by *FertiPROTEKT*

Contents lists available at ScienceDirect

human reproduction ORIGINAL ARTICLE *Infertility*

Oocyte yield after ovarian stimulation is similar in most malignant diseases but reduced in non-malignant diseases – analysis of >1.000 ovarian stimulation cycles performed for fertility preservation

M. von Wolff, T. Bruckner, T. Strowitzki, A. Germeyer

FertiPROTEKT
Timing of ovarian stimulation in malignant diseases – an analysis of >1.000 ovarian stimulation cycles performed for fertility preservation
Michael von Wolff, Ariane Germeyer¹, Frank Nawroth^{2,1}, And Ariane Germeyer^{3,1}

.....and most important

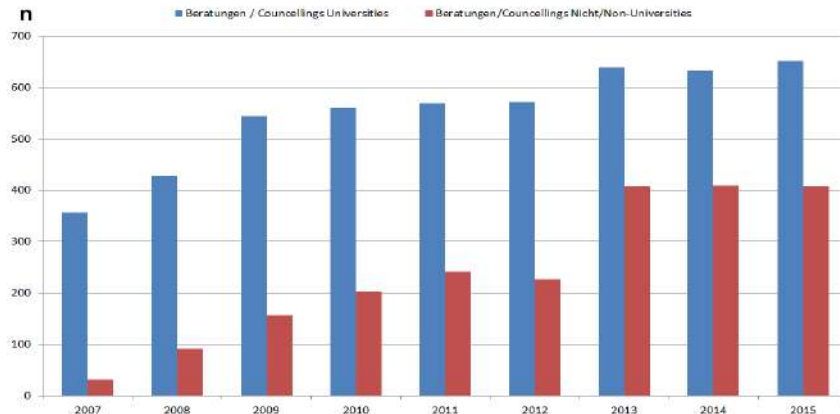

Only a well functioning national network will allow to offer the best fertility preservation techniques and an individualized treatment to patients in all areas of a country.

Agenda

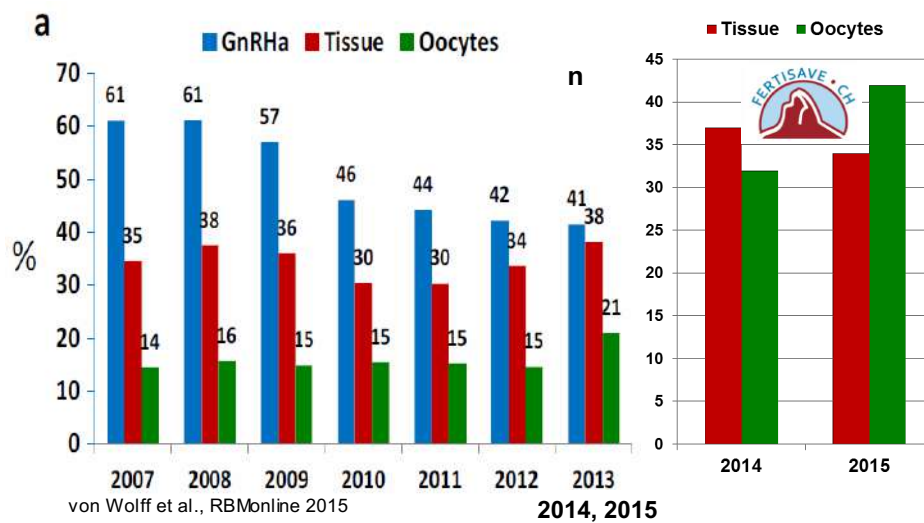

- **What kind of oncofertility networks do already exist?**
- **Why creating a network?**
- ***FertiPROTEKT experiences***
- **Conclusion**

FertiProtekt – the registered counsellings of women

Beratungen (Nicht) Universitäten
Counsellings (Non) Universities

The performed procedures (FertiPROTEKT)

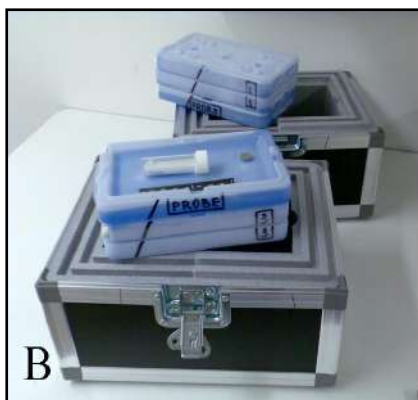

Get started !

- **Create of coalition of the willing (President Bush)**
- **Do it under the umbrella of a national society**
- **Allow those who will perform the fertility preservation procedures to get the lead: the reproductive physicians**
- **Organize the first meeting under the roof of an IVF society together with many pharmaceutical companies and invite all national centers and oncologists as well as some good speakers.**

Create centralized cryobanks – if possible

Special tissue transportation boxes: Tissue can be transported for 24 hours in transportation medium (*FertiPROTEKT*)

Create a good website – the heart of a network...

Well known

Scientifically active

Be supportive!

- 200 pages book for both oncologists and reproductive physicians
- Free of charge print version
- Free of charge downloadable on the FertiPROTEKT website

Organise annual meetings which are fun and support the concept of national integration!

Conclusion

The success of Oncofertility networks is based on simplicity, integrity, dedication, logistics and on the decision that the network is exclusively designed to help patients.
