

Dear Colleagues and Friends,

As the ISFP enters its twelfth year I would like to thank to Board and the membership for its ongoing support. I am both honored and humbled to assume my role as President of the ISFP. I would like to thank our most recent president Dr. Dror Meirou for his long-standing contribution to the Society and for his continued of support.

I am committed to increasing the presence of the ISFP in a very complex and challenging health care environment. My goals for the Society during my tenure include:

1. Increase membership
2. Update our website to have more scientific content
3. Highlight member successes in the field of fertility preservation
4. Improving our finances
5. Organizing our Biennial World Congress

The clinical progress in our field is growing worldwide. The breadth of knowledge and skill in our membership should position us to be on the forefront of many discoveries and research.

I encourage all our members to visit our website often for updates. We will continue with our Newsletter, book reviews, and meeting registration discounts as well as additional values for your membership support.

Our 6th Biennial World Congress will be held in New York USA, November 14-16, 2019. The Congress will offer presentations, cutting edge and up to the minute developments in the field of fertility preservation, and hands on workshops. We look forward to seeing you.

I look forward to continuing to move our Society forward.

Kind Regards,

Tommaso Falcone, MD
ISFP President
