WELCOME NOTE

Dear ISFP Members and Friends,

It is our honor and pleasure to welcome you, society members and participants from 56 countries, to the 5th World Congress of the International Society for Fertility Preservation (ISFP) in Vienna!

In line with the ISFP mission to spread education and to facilitate fertility preservation awareness, the ISFP Congress provides a forum for presentation of and discussion on the latest clinical and scientific developments in the field of fertility preservation. The society wishes to thank the **62 leading international experts** who kindly agreed to share their cutting-edge basic science and clinical research to enrich knowledge in the field.

Our **pre-congress workshops** focus on clinical education, ovarian tissue cryopreservation and transplantation techniques, including hands-on fertility-sparing endoscopic surgery. **More than 130 abstracts** were submitted, and accepted abstracts will be presented in the basic science or clinical Free Communication Sessions and Poster Presentations.

The congress also provides a stage for a large number of **young physicians and scientists**, and we encourage young physicians and students to use this forum for direct communication and discussion with the many leading experts attending the congress.

The society wishes to extend its deepest gratitude to and acknowledges the support of the **local organizing committee** in creating this excellent congress in Vienna.

We hope you will enjoy the congress, enrich your knowledge in the field, participate in fruitful discussions with colleagues, meet old friends, and make new ones.

We also encourage congress participants who are not yet members to visit our new website and join the society!

ISFP ACCREDITATION

Continuing Medical Education Accreditation points (CME)

'The 5th World Congress of the International Society for Fertility Preservation (ISFP)' (in Vienna, Austria (16-18.11.2017)) is accredited by the European Accreditation Council for Continuing Medical Education (EACCME) to provide the following CME activity for medical specialists. The EACCME is an institution of the European Union of Medical Specialists (UEMS), www.uems.net.

'The 5th World Congress of the International Society for Fertility Preservation (ISFP)' is designated for a maximum of **19 hours** of European external CME credits. Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity.

Through an agreement between the European Union of Medical Specialists and the American Medical Association, physicians may convert EACCME credits to an equivalent number of AMA PRA Category 1 Credits™. Information on the process to convert EACCME credit to AMA credit can be found at www.ama-assn.org/go/internationalcme.

Live educational activities, occurring outside of Canada, recognized by the UEMS-EACCME for ECMEC credits are deemed to be Accredited Group Learning Activities (Section 1) as defined by the Maintenance of Certification Program of The Royal College of Physicians and Surgeons of Canada.

EACCME credits

Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity. The EACCME credit system is based on 1 ECMEC per hour with a maximum of 3 ECMECs for half a day and 6 ECMECs for a full-day event.

ABOUT THE INTERNATIONAL SOCIETY FOR FERTILITY PRESERVATION (ISFP)

The International Society for Fertility Preservation is an international nonprofit organization, wholly independent of government.

The International Society for Fertility Preservation was founded upon the guiding principles of integrity and diversity of all international societies. Its role is to lead and promote progress in fertility preservation by international cooperation and collaboration. The ISFP is dedicated to scientific innovation and advances in medical care in the field of fertility preservation.

The ISFP will endeavor to 1) facilitate networking between scientists and clinicians worldwide; 2) advocate patient rights and educate the public as well as medical professionals; 3) share current knowledge and new discoveries through the ISFP website, the ISFP World Congress, and various workshops; 4) promote multidisciplinary collaborative research; 5) develop a consensus and guidelines on fertility preservation; and 6) serve and unite communities.

ISFP Activities

Supports scientists

Supporting excellence and scientific progress in the field of fertility preservation is at the heart of the society's work.

Encourages research

The society encourages clinical science and research activities in reproduction in the context of fertility preservation for patients at risk of premature gonadal failure.

Provides scientific advice

The society can provide physicians and scientists with independent and objective scientific advice on a wide range of issues. This advice is based on the latest evidence from global experts in the field.

Holds meetings and events

Every other year, the ISFP holds its official symposium. The society's inaugural event was held in Brussels in December 2009. The aim is to bring together leading scientists to discuss new and exciting developments in fertility preservation.

Promotes international relations

The ISFP collaborates with ESHRE (European Society for Human Reproduction and Embryology) and ASRM (American Society for Reproductive Medicine), as well as special interest groups on fertility preservation. The ISFP organizes events to showcase outstanding worldwide research and encourages international scientific collaboration.

Rewards achievement

Outstanding scientific achievement is recognized through prizes awarded by the ISFP at its biennial meeting.
